

**FLUROPON® EFFECTS**

**KAMELEON™**

**70% PVDF COIL AND EXTRUSION  
COATING SYSTEM**

## Subtle has never been so bold.

Fluoropon Effects Kameleon colors by Valspar offer pearlescent hues that appear to change when viewed from different angles.

### You're not imagining it. The color just shifted.

The innovative Kameleon system uses mica flakes to create a consistent iridescent, gradient look. A blend of ceramic and inorganic pigments creates an original, brilliantly subtle look that will turn heads for years to come. It's ideal for monumental high rises, commercial and residential buildings.

### One-of-a-kind effects. 70% PVDF Fluoropon performance.

- Same advanced protection as our 70% PVDF Fluoropon products
- Superior resistance to UV rays
- Outstanding color retention and consistency
- Excellent overall adhesion
- High durability— three coat system
- Coil and extrusion applications
